Coding & Solution

Date	15 March 2026
Team ID	XXXXXX
Project Name	Streamline IT Procurement: Automating Standard Laptop Orders
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	[Paste your GitHub / GitLab or hosted link here]
Programming Language(s)	Python, JavaScript, HTML, CSS
Framework(s) Used	Streamlit / Flask, React, Bootstrap
Key Features Implemented	• Automated laptop requisition catalog & portal • Role-based approval workflow engine (Manager & IT Approval) • Automated notification alerts & procurement status tracking
Pending / Incomplete Features	• Direct API integration with vendor inventory (e.g., Dell/Lenovo APIs) • Advanced analytics dashboard for procurement metrics
Setup / Run Instructions	1. Clone repository: `git clone <repo-url>` 2. Install dependencies: `pip install -r requirements.txt` 3. Set environment variables in `.env` 4. Run application: `streamlit run app.py`

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	**Yes**
2	Meaningful variable and function names are used	**Yes**
3	Code includes comments / documentation where necessary	**Yes**
4	Error handling is implemented for critical operations	**Yes**
5	The application runs without critical errors	**Yes**
6	Code is committed to a version control repository	**Yes**

Additional Notes / Comments:

Project Overview & Status:
The *Streamline IT Procurement* application automates the end-to-end workflow of ordering standard employee laptops. It replaces manual email-based approval processes with a structured web application interface.

All core modules—including input validation, data persistence, and workflow approval state changes—have been implemented and tested successfully according to requirements.
