Project Name	Streamline IT Procurement: Automating Standard Laptop Orders with Workflow Automation
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1: Order Request	Stage 2: Approval & Routing	Stage 3: Fulfillment & Delivery
Actions *What does the customer do?*	• Employee selects standard laptop configuration in portal. • Submits the procurement request form online.	• Manager reviews pending request notification. • Approves or rejects laptop request via workflow engine.	• IT team provisions device and assigns serial number. • Employee receives laptop and confirms delivery.
Touchpoint *What part of the service do they interact with?*	• Self-Service IT Procurement Web Portal. • Automated confirmation email.	• Automated Approval Notification System. • Management Approval Dashboard.	• IT Asset Management System. • Delivery tracking link / Handover confirmation portal.
Customer Thought *What is the customer thinking?*	• "Is this form clear and easy to fill out?" • "I hope my manager gets this notification quickly."	• "I need to approve this fast so my team member can work." • "It's great that I don't have to manually route emails."	• "When will the laptop be ready for pickup/shipping?" • "Everything is configured and ready to go!"
Process Ownership *Who is in the lead on this?*	• Corporate Employee / End-User	• Department Manager & Finance Team	• IT Operations & Logistics Team
Opportunities *How can we improve this stage?*	• Pre-fill employee data automatically using Single Sign-On (SSO). • Provide real-time stock availability for standard hardware.	• Implement auto-approvals for standard low-cost laptops. • Send automated reminders on mobile apps (e.g., Teams/Slack).	• Integrate direct vendor dropshipping for faster delivery. • Automate device pre-configuration via cloud management (Autopilot).
